

```
$ go get github.com/go-hep/fads/...
```

```
$ fads-app -help
```

```
Usage: fads-app [options] <hepmc-input-file>
```

ex:

```
$ fads-app -l=INFO -evtmax=-1 ./testdata/hepmc.data
```

options:

- cpu-prof=false: enable CPU profiling

- evtmax=-1: number of events to process

- l="INFO": log level (DEBUG|INFO|WARN|ERROR)

- nprocs=0: number of concurrent events to process
